Models & Additions

2 Additional models will be added in place and addition to the other models to benefit from criteria as well as with user experience for the website.

A blog will be added to allow amputees to talk and know more about the bionics and also to leave their blog post about their experience with the product so other amputees/users can see it which in effect will make them purchase or consider purchasing

The contact model will be used to allow users to get in touch with the staff/web admin so incase of any queries or questions, this is when this will be used.
